About This Game

It's a regular Tuesday evening when you are pulled from the Earth and sent to a place where magic still exists. You are given a wizard's tower filled with arcane knowledge that you are expected to learn. Thrust into a war between two nations, it's up to you to save the kingdom where you now live.

The Last Wizard is a 185,000 word interactive fantasy novel by Mike Walter, where your choices control the story. It's entirely text-based—without graphics or sound effects—and fueled by the vast, unstoppable power of your imagination.

Your choices will influence who rules the land and what happens to the civilians living there. Will you find love or will you strive to return to the life you were forced to leave behind? Will you save the kingdom, or will you betray the people for your own personal gain? The choice is yours!
